

Walkways

anti vibration mats

Walkway Tiles

Our walkway tiles are ideal for establishing a clear pathway for use as a safe access or protected access area as required

The rubber tiles will provide protection for the roofing materials, preventing costly leaks and repairs.

The 500mm² tile interlocks using plastic pins, to help prevent them moving apart

They have a dual purpose of also being used as anti vibration mountings

The 1m square tile can come in red, green or black and is also used for roof patios

Our Walkway Tiles & Anti-Vibration Mats are made from Recycled SBR Rubber, making them ECO friendly. They also have the added advantage of vibration & noise absorption which makes them the ideal product for roof or ground level installations

Product Code	Model	Weight
COMBI 19	Walkway & Vibration Mat 500mm x 500mm x 45mm (pinned)	7.4kgs
COMBI 49	Walkway & Vibration Mat 1m x 1m x 25mm	18kgs
