

NITROGEN REGULATOR 50 BAR

This regulator is specifically designed to meet the needs of the heating, ventilation and air-conditioning HVAC industry designed for leak testing and pressure testing applications. 50 Bar high-pressure regulator with 1/4" flare fitting. Used for pressure testing.

Technical Specifications

Gas: Nitrogen

Max. Inlet Pressure: 230 Bar

Inlet Connection: w24.32 x 12/1"

Outlet Connection: G3/8"

Max Capacity: 450M 3/h

Working Pressure: 50 Bar

Working Pressure Gauge (Scale): 100 Bar

ISO: 2503

Net Weight: 1.73

Gross Weight: 0

Length: 190mm

Width: 190mm

Height: 185mm

Code: RHP800
